Attendees at the Apple Worldwide Developers Conference got a glimpse of the new software for all iPhones, including enterprise features, iPhone software development kit, a few new features such as parental control, additional languages, and some great games. Note: When you buy something after clicking links in our articles, we can earn a small commission. Read our policy affiliate links for more details. The iPhone is not so much a smartphone as a phone app. That's all the Home Screen really is - the gateway to apps. Click on the icon, start the app. But what apps should you run? Of the nearly one million apps on the iPhone App Store that the ones every new iPhone owner really need to have? Which of them will best help you in your work, your hobbies, your responsibilities and fun? Of all the apps that deserve your attention? Which ones are the best? In short - these. Based on experience and countless tests and comparisons, these are apps and games that we consider a must-have, and we recommend you download now. These are the best apps for the iPhone. We can earn commissions for purchases using our links. Learn more. While the iPhone can't heal lepers or turn water into wine, it can help you do many other useful things such as sharing high-resolution videos, diagnosing your own diseases and even creating your own virtual life form! With Apple's iPhone App Store due to go online today, we decided to take a look at some of the more interesting third-party programs, apps and websites that have been designed to help make your iPhone an integral tool for work and fun. For IT departments that want to have more control over how iPhones interact with their networks, Azaleos has expanded its OneStop remote email monitoring service to the new 3G iPhone. Azaleos, a Seattle-based company that has traditionally provided email management for BlackBerry and Windows Mobile devices, uses Microsoft ActiveSync technology to take control of its OneStop service, a subscription offering that provides 24-hour monitoring, maintenance and management. OneStop is part of Azaleos' OneServer package, which deploys a dedicated device to the IT network that provides an active/passive, error-tolerant and cluster Exchange platform for corporate communications. Funambol Open Source Wireless SyncFunambol, an open source software development company that specializes in mobile app servers, currently provides a free open source email sync app for the iPhone. Starting this week, iPhones will be able to synchronize their personal information management (PIM) data for free through the myFUNAMBOL portal to popular email systems such as Gmail, Yahoo and AOL. The Funambol wireless synchronization platform, which is supported through advertising, is also available on Windows Mobile and BlackBerry devices, and will soon be available on Google Android Android devices Ok. The software for the app can be downloaded directly from the myFUNAMBOL website. For those who are tired of having their wallet or wallet overstuffed with business cards, 211me's paperless business cards can only be a ticket. 211me, which describes itself as a mobile mash-up company, allows users to create their own maps, flyers and promotions designed specifically for mobile phones. In this way, companies can create digital business cards for their employees or can develop promotions that can be sent electronically to any mobile phone in the U.S. Any leaflets and business cards can also be distributed on social networking sites such as Facebook and Friendster, the company said in a statement. Users can develop their own content by uploading their photos to the 211me website, where they can choose from a wide variety of backgrounds and text styles. The concept of RemindYou is surprisingly simple - in fact, its goal is to make sure you never miss another appointment ever again. And how do you do that? Well, by syncing with iCal, Outlook, or Entourage, and then overlaying a graphic of all your appointments to the iPhone launch picture. So instead of seeing the image of the Earth from space as the default screen launch every time you unlock your iPhone, you'll see a list of all your meetings. RemindYou can be purchased from the iPhone 2.0 App Store for \$19.95 for a lifetime license. While the iPhone has revolutionized the way we surf the web on mobile devices, it can initially create problems for new users who are not used to entering such a compact space. Nuance is currently working on bringing its voice recognition technology to the iPhone to dramatically reduce the need for users to peck away at the qwerty keyboard. This works like this: you run the app from the iPhone launch menu, press the talk button as soon as the app starts, you verbally tell the program what you want to search and then press the stop button. The program will then translate your words into text and search the Web for you. You can watch the demonstration of the software, which is still a prototype and will not be ready for release until the fall, on the Nunace website. By now everyone knows that the 3G iPhone will support Microsoft Exchange ActiveSync and Cisco IPSec VPN to give corporate customers at least some security guarantees for sending and receiving corporate emails. The people at HyperOffice, however, want to give you more. By logging into your personal HyperOffice account through your iPhone's web browser, you'll have access to apps such as online document management and commenting, discussion groups, and documents, calendars, contacts, projects and tasks. Because HyperOffice is a service, users don't need to download it from AppStore and access it exclusively through the company's website. The service is currently priced at \$7 per month per user, and can also work on all smartphones and Devices. Is there anything more interesting than developing your own strange-looking creatures that evolve from single-celled organisms? OK, so it may not sound like everyone's cup of tea, but that doesn't mean everyone can't enjoy Spore, a strangely addictive strategy game from Electronic Arts that will be one of the flagship games to make their way to the iPhone platform. As demonstrated earlier this year, the iPhone version of Spore will give users touchscreen capabilities in developing their own individual creatures, from their genesis to single cells to their possible evolution into intelligent, cooperative species. Using mpEG-4 h.264 video codec and allowing users to download videos of any length, mDialog is working to become a high-resolution YouTube version. In addition to offering standard features such as the ability to vote, rate and comment on videos, mDialog also allows users to provide fully customizable surveys to get detailed reactions and tips from their audience in real time. Especially for Apple TV and iPhone, as well as the common Internet, mDialog offers users up to 1GB of free video storage, with monthly membership plans of \$4.99 for 8GB storage, \$9.99 for 20GB storage and \$24.99 for 50GB storage. MDialog can be accessed online and cannot be purchased through the App Store. Checking out baseball scores on your iPhone is one; Check out the official highlights of the game is quite different. Jumping early on the 3G iPhone bandwagon, Major League Baseball has developed an app called MLB At Bat that will offer fans video highlights of games on their iPhones literally moments after they occur. Currently, MLB plans to offer MLB At Bat for an annual fee of \$4.99. The app will be available when the iPhone App Store launches July 11. Pentaho, an open source business analytics app developer, has developed an iPhone Web application that gives employees and management mobile access to critical company data such as inventory reports, financial statements, revenue reports and sales reports sorted by customer, territories and product lines. The demonstration of the open-source Pentaho iPhone app, which specializes in providing business intelligence analysis and analysis, can be seen on the Pentaho website. Over the past two years, Twitter has taken the online world by storm as a happy environment between blogging and texting. By allowing users to post updates of up to 140 characters on their Twitter social media pages, Twitter has become a popular way for people to provide real-time updates about their work and lives to their friends and colleagues. Twitterific, an interface developed by software developer iConfactory, is designed specifically to provide Twitter is for Mac users and has been available for a jail-broken iPhone since last year. It will officially come to the iPhone later this week. For fans of the old school comes eight bit game graphics: Touch (see below) from the legendary Japanese gaming company Hudson Soft. Bomberman tells the fascinating story of a disgruntled bomb-making robot who tries to escape his work at the factory by blowing a lot of things up. To win the game, you have to guide The Bomberman through a few mazes, looking down scary enemies that look like giant gloomy balloons. Like Pac-Man and Donkey Kong, Bomberman is a timeless classic that should make a successful transition to the world of the iPhone. Worried about having a cough that seemingly won't go away? Worried about that leg rash that costs you sleep at night? Don't be afraid, because information about the health and benefits of A.D.A.M. technology has developed a web application that allows users to match their medical symptoms with grades and potential treatments. In addition, the navigator allows users to know when they can help themselves through self-care or whether they should consult with a health care provider. The company says its medical data and information is provided from its medical review and URAC accredited healthcare encyclopedia.If 8GB iPhone storage is not enough for you, give Syncplicity an online storage service a try. Synchronization allows you to store up to 2GB of documents, images, music and video files for free and allows you to access it instantly on your iPhone from the cloud. All you have to do to access the stored data is log on to syncplicity's website and then view the stored documents. Syncplicity currently offers 40GB of storage for \$9.99 per month (\$99.99 per year), and the company will add 100MB to your account for each referral you provide. A great tool for those who want to get into golf on vacation or on a business trip, GolfFlyover can provide iPhone users with 3D flyover cards from over 10,000 golf courses in full from across the United States. By the end of the year, the website projects that it will map every golf course in the United States. All golf course information is free and you don't need a membership to view the cards. Oldie but goodie, AOL's Instant Messenger is one of the classic web apps for communicating and keeping in touch with friends. Let's say you want to bet online on a 1955 Gibson Les Paul Junior electric guitar, but you don't have time to sit in front of a computer screen all day. Simple! Just carry around your iPhone and use eBay native iPhone apps to get constant updates whenever a punk who calls himself Grlfan62 has exceeded your bid. The eBay app is free and available in the App Store. Not wanting to get left in the world of online media, the AP has created a mobile news network to provide readers with the latest headlines about politics, sports, business and entertainment. AP iPhone Free and available in the App Store. Although it sounds like an app designed specifically for stalkers, Loopt's social network mapping tool is actually The program is designed to allow you to see where your friends are hanging out in your area. Essentially, whenever someone on your personalized buddy list is signed to Loopt via their BlackBerry, iPhone or other compatible wireless devices, Loopt will track them for you on a map that is custom-made for wireless devices. If you don't want to be found at some point, of course, you can get out of Loopt or change your privacy settings. A quick link to all your drug-related issues, the epracates' drug database gives you information about drug use, recommended doses, prices, interactions with other drugs and potential adverse reactions. This is another app that is currently available in the App Store. This story, 20 Cool iPhone Apps was originally published by Network World.
